PRESIDENT'S

MESSAGE

My year as your President is more than half over and I'm most grateful for the splendid co-operation from my officers and committee chairmen. It is certainly making my job a lot easier. One note is the passing of one of our most faithful members who was in charge of security for many years -- C.R. Young -- better known as Dick.

At this writing Ann and I have visited 63 of our 85 member clubs and attended several Conventions, the most recent being the 77th Annual Convention of the American Numismatic Association, which was very well represented with officials and members of the Numismatic Association of Southern California. So many in our area took advantage of the Convention being so close. The Convention was well attended and every one seemed to be having a good time along with getting a few coins they needed.

Next Board meeting December 1968. All Club representatives please plan to attend.

Best regards,

Foster Hall, President

YOUR EDITOR SPEAKS

The Club Meeting Bulletins are coming in regularly from a good percentage of the several member Clubs, but there is no appreciable increase from those Clubs who are not mailing them to the Editor. It is not possible to report your meeting activities unless they are made available for publishing. For the benefit of those Clubs who are not mailing their Bulletins to the Editor, please take stock of this situation and make arrangements with your Corresponding Secretary to have them mailed to the address of the Editor as noted on the inside of the front cover of the NASC QUARTERLY.

To those member Clubs that are sending their Bulletins in regularly, I would like to add that any extra report of activities from your Club would be appreciated. At the present time the report is taken mainly from the educational program of the Club meeting, but over and above that, there may be a special report you would like to have published in the Quarterly. All the Bulletins received by me are carefully filed away where they will be available to the judges whose responsibility it is to determine which Club is to receive the President's Trophy. The importance of your Bulletins being sent to the Editor is two-fold. Firstly, that they may be filed away in order to make them available to the judges, and, secondly that a report of your Club activities may be published. By these reports others in the Numismatic field are apprised of your accomplishments, which tends to establish a greater unity among all the member Clubs.

As a parting thought, I would like to again bring to your attention our need for a constant flow of Numismatic articles for publication in the Quarterly. This is made possible by your contributions of articles that you would like to see published, to which full credit will be given. Your assistance in this respect is vitally needed and, as your Editor, I am appealing to you to make contributions of articles that may be published for others to read. To those presented articles, please accept my heartfelt thanks.

Sincerely,

William O. Wisslead.

"The surest way not to fail is to determine to succeed"- Franklin.

IN MEMORIAM

With deepest sympathy we announce that C. Richard Young passed away on August 11th, 1968.

"Dick" Young resided at 531 N. Myers Avenue in Burbank, and had been a resident of California for the past 30 years. He spent his early years in and around Lincoln, Nebraska, and attended College there.

During World War I, he served with the Air Force, flying missions out of England, and upon returning to civilian life, became one of the first Air Mail Pilots and was a life time member of the Air Mail Pioneer's Association.

He was a Master Mason, a member of the American Legion and the International Order of Odd Fellows of Lincoln, Nebraska.

During his early years, Dick followed his chosen profession as a Building Contractor and was quite active in Southern California, until forced to retire.

Dick's interest in Coins was smoldering for quite some time and became a very active hobby upon his retirement. He was Past President of the Glendale, San Fernando Valley and Hollywood Coin Clubs. He was Security Officer for the N.A.S.C. and had been a member of the Board of Governors for some time.

He enjoyed speaking on his hobby and his delivery was interesting to all, making him in great demand to the various Coin Clubs throughout Southern California.

His other great interest was working with children in the field of Coin collecting, with whom he exhibited great patience and understanding.

Services were held at the United Brethern Church of Marquette, Nebraska. He will be greatly missed by his many friends.

COLLECTOR'S GUIDE to U.S. HALF CENTS 1793 - 1857

By SOL TAYLOR

In order to collect a series of coins intelligently, one needs much information related to the coins in the series. The U.S. half cents issued from 1793 to 1857 was a very popular collectors' series during the past one hundred years. As a result, some very fine collections were assembled including nearly all known types in top condition. From these collections -- notably those of Ryder, Alvord, Jenks, Dupont, Brobston, and others. -- several books on U.S. half cents were published. A serious collector of this series would require the books by Frossard, Gilbert and Bowers-Ruddy to get a fairly full picture of the task ahead of him. In addition, he would also need the catalogues of various sales of the past fifty years featuring items from the famous collections in order to follow the price trends of the top grade specimens.

This article will list by a series of tables, those items of reference necessary for both the beginner and the advanced collector of U.S. half cents.

TABLE 1. - A BASIC TYPE SET OF U.S. HALF CENTS

YEARS INCLUDED	TYPE	PRICE RANGE (1968) GOOD TO UNCIRCULATED
1793	I	\$200 - 1,500
1794 - 1797	III	\$55 - 650
1800 - 1808	III	\$8 - 100
1809 - 1836	IV	\$8 - 55
1837*	IVa	\$12 - 65
1840 - 1857	V	\$8 - 55

* - the 1837 half cent token is not a U.S. mint issue but did circulate as a half cent and is regarded by some as suited for a U.S. half cent type set

Table I refers to the common coins in each type category. The range for the rare dates and types goes well above the figures listed.

* - 1795 G-2 is probably an altered 1795 G-1 according to S.H.Chapman and others.

** - 1837 is not a U.S. mint issue.

Tables 11 includes all known types to Gilbert plus additional types described by Bowers and Ruddy. The current rarity scale ranges from 1-8 instead of 1-10. Refer to Table 111. "E" numbers adopted by Bowers and Ruddy reflect the name "Empire" from their firm, Empire Coin Company. "E"-numbers followed by an "a" or "b" refer to die stages rather than different die types or die combinations. For a complete description of each type refer to the books by Gilbert or Bowers and Ruddy.

TABLE III - RARITY SCALES USED BY EMPIRE COIN COMPANY (BOWERS & RUDDY) AND BY DR. J. HEWITT JUDD ADAPTED FROM DOCTOR WILLIAM H. SHELDON.

RARITY NUMBER	IMPLICATIONS
R-1	OVER 1,250 known
R-2	501 - 1,250 "
R-3	201 - 500 "
R-4	76 - 200 "
R-5	31 - 75 "
R-6	13 - 30 "
R-7	4 - 12 "
R-8	2 or 3 "
Unique (and Unknown)	

These terms apply to the date and type only with no specific regard to available grade. Often a coin in R-5 found in choice red uncirculated condition would price out on par with coin of R-8. Similarly, coins described as "Condition Census" or "One of Three Best Known" also would be regarded as greater rarities than the same dates and types in average collectable condition.

TABLE V. COLOR VALUES IN EVALUATING U.S. HALF CENTS

Based on Auction and Fixed Price Sales, the higher grades of U.S. half cents bring
premiums in accordance with their colors -- luster, distribution, brightness and
combination of colors. A simple chart listing these features is described below.

T-1, The highest desirability and highest premium; T-2, desirable with a
premium; T-3, Average with little premium; T-4, below average, no premium.

VALUE	COLOR	DIS. of COLOR	LUSTER
	Gold	Evenly colored,	Fully bright
	Golden Red	both sides including	or satin bright
	Bright Mint Red		
	Purple (Proofs usually)	One side uniform, the	One side bright,
	Reddish-Brown	other irregular. Both	the other dull.
	Olive Red	sides uniform, rim	Partially bright
	Iridescent	dark.	each side.
	Olive	Mottled or irregularly	Dull, little or
	Tan	colored. Only few	luster
	Brown	areas with color.	
	Blue-Green		
	Steel		
	Dark Brown Black	Spotted, streaked	Dark, no
	Green Grey		luster

Thus, a top premium piece in Unc-60 or Unc-65 would bring a premium over similar prices if it rated T-Q in color, distribution, and luster. Reglored or cleaned coins all fall into category T-4 and usually are colored reddist-orange or brassy.

BLE VIII. INTERESTING FACTS REGARDING U.S. HALF CENTS.

The Proof originals of 1840 and 1841 were struck on reeded planchets -- the only U.S. copper coins to be so. However, the reeding was flattened by the plain collar used on the dies. Cited in the N.N.#59 catalogue.

The price of the Jenks sale catalogue exceeds today the price realized for any of the half cents in the sale. (i.e. about \$350.00).

Almost all the half cents struck since 1800 exist in brilliant uncirculated condition except the 1853 (according to Q. David Bowers, W. Breen, and comments by H. Chapman).

The 1795 G-2 listed in Gilbert and earlier references, is a 1795 G-1 which for reasons not known was altered by removing the lettering from the edge and then hammering the coin to full diameter (description of the alteration by Chapman in the Alvord sale).

The impurities found in the alloy used in half cents (and large cents) include: Arsenic, Cobalt, Magnesium, Iron, Nickel, Silver, Sodium, Lithium and Oxides, Carbonates and Hydroxides of these metals. The characteristic patinas of the circulated half cents often reflect the nature of these impurities.

Collector Profile

Clifford H. Kreizel, born Oct. 5, 1905, at Rogers, Nebraska, was the first of four sons of the Henry and Mary Kreizels. At the age of seven years his parents and brothers moved to a farm east of Fremont, Nebraska, where he attended school at District 5. On June 29th of 1931 he married Xenia Rightnour at Council Bluffs, Iowa. His family grew to the size of six children, three boys and three girls. The eldest of the girls is a twin, Janice who lives in Fremont, Nebraska, and Jeanette living in North Bend, Washington. The youngest daughter, Sharon, is presently living with her father and mother in Hacienda Heights, Calif. along with her two daughters, while her son is with the United States Marine Corps in Vietnam. Of the boys, the first is stationed in Uban, Thailand; the second, Jr. lives in Mead, Nebraska and is presently employed by the Light and Power Company in Lincoln, Nebraska; the third son resides in El Monte, Calif. And now Clifford boasts of seventeen grandchildren.

Residing in Hacienda Heights,

California, Cliff is a plumber by trade. To serve his country in the capacity of his trade, he spent several months during the working season of 1953 at the Thule Air Base in Greenland. When Cliff moved with his family in 1957 to California he decided to go to a night school for adults to learn a hobby, but hardly had he gotten started when he met friends that introduced him to the hobby of coin collecting. His interests in this new found hobby has been a way of life with him ever since. Cliff's first interest in coin collecting was through his friendship with Rod and Thelma Loeffler, the friends that he met after starting to night school. The first Coin Club that he visited was the Orange County Coin Club which at that time was meeting at the Women's Club House in Brae, Calif. The first Club that he joined was the Monterey Park Coin Club at which he sold tickets, was on the Board of Governors and served one year as President.

Cliff always takes an active interest in any Club that he is a member of. Beside being past-president of Monterey Park Coin Club, he is also past-president of the Pico Rivera Coin Club, and is currently Vice-President of the Upland Coin Club and Lawndale Coin Club. He is now serving his second year as president of the Pomona Valley Coin Club and also the second year as president of the East Los Angeles Coin Club. He is a member of the La Mirada, Echo Park, and General Dynamics Coin Clubs, and also of

VISUAL EDUCATION LIBRARY

The N.A.S.C. Collection of Visual Education material may be borrowed by N.A.S.C. affiliated clubs for club programs on individual lectures to groups. Clubs furnish their own projectors. Some of the new model slide projectors will not accommodate the thicker plastic or glass mounted slides. Projectors which permit each slide to be fed individually by hand are recommended.

Slides are shipped by insured parcel post (insured for \$50.00). This is the only cost involved. When requesting slides, give exact dates of meeting and several alternate choices. The more popular slide sets are frequently scheduled months in advance. The longer the notice given, the greater the opportunity of receiving slides for a specific meeting.

SLIDE SETS

Set #1. COINS OF COLONIAL AMERICA

61 color slides of the principal types of coins used in Colonial America. The series begins with the Sommer Islands shilling of 1616 and runs through the Spanish milled dollar.

Set #2. TYPES OF COMMEMORATIVE HALF DOLLARS

48 color slides containing both obverse and reverse of each coin.

Set #3. U.S. COPPER COIN TYPES

51 color photographs of types of half cents, large cents, small cents, through the current coinage and two cent pieces.

Set #3B. U.S. TYPES, 3¢ PIECES THROUGH 20¢

54 color photographs at 3¢ nickel, 3¢ silver, half dimes, nickels, dimes and 20¢ pieces. Includes all current coinage as well as the early types.

Set #4A. U.S. TYPES, QUARTERS TO SILVER DOLLARS

58 color slides of quarters, half dollars and silver dollars. All types are included through the current coinage.

(Note on sets 3, 3A, 3B, 4 and 4A). Every effort will be made to send the exact slide set of the above group requested. However, because of scheduling circumstances, substitutions will often have to be made and thus a club requesting #3, for example, may receive #3A or #3B as an alternative.

Set #8. ANCIENT GREEK COIN TYPES

29 color slides covering the period of 700 B.C. to 336 B.C. This set shows the development of coinage art from its beginning to its peak.

9. ANCIENT GREEK COIN TYPES

is a continuation of Set #8 and has 32 color slides covering the period from 336 B.C. to 57 A.D.

10. CONFEDERATE STATES OF AMERICA CURRENCY

the Alamo Coin Club of San Antonio, Texas. At the Pico Rivera Coin Club on one occasion he was asked to be the auctioneer, and thus began another phase of being helpful in Coin Clubs in a capacity that he is also very good at, and which is helpful to the Clubs where he auctions.

He has given talks at many Clubs, relating his experiences in Greenland in 1953. The title of his talk is "IVORY AS A MEDIUM OF EXCHANGE" and he always brings along a few pieces of ivory that he obtained in Greenland. Cliff says he has given this talk at least two hundred times, not only at Coin Clubs, but also at schools and civic organizations in Nebraska.

Cliff recently became a member of the California State Numismatic Association, has membership with the Numismatic Association of Southern California, the Elongated Cent Society, and the California Exonumist Society. He has resided in Hacienda Heights, Calif. the past seven years, is a Mason of thirteen years, is a member of Eastern Star, a member of the Reorganized Church of Jesus Christ of Latter Day Saints plays the part of Santa Claus at Christmas time at several Coin Clubs, and in general, can be found taking a busy and active part in many Coin Clubs.

DID YOU KNOW that the model for the reverse of the Buffalo Nickel was the famous "Black Diamond" of the New York Zoo? He was also featured on the ten dollar note of the Legal Tender Issue of 1901.

Numismatic Events

The LAWNDALE COIN CLUB and the SOUTHERN HUB COIN CLUB made a joint trip to the studio of KTTV on the afternoon of June 19th to attend the showing of the Woody Woodbury TV show. Those who attended the show enjoyed it very much.. It was interesting to witness how the show is produced. Special guest announcer was Dick Dawson of "Hogan's Heroes" TV show fame. Other guests on the show included singer Carmel Quinn, pianist "Big" Tiny Little, actress Susan Strausberg, singer Jerry Antes currently working at the Dunes Hotel in Las Vegas, and the present Miss U.S.A. from the State of Washington. There were reportedly 106 members and guests from both Clubs that attended the show. This means a portable television set will be awarded for the attendance and will be delivered to V.P. Sally Marx. The portable T.V. will be given away at the September meeting of the Southern Hub Coin Club.

In 1857, a group of German families in San Francisco decided to look for a more temperate climate in which to take up farming. They formed a company and sent a committee looking for the ideal location. It was found on the banks of the Santa Ana River and 1165 acres were purchased. Work was begun and an area was set aside for a townsite, the rest being divided into equal shares. The new community was named Anaheim. Ana from the river, and 'heim' meaning home, from their native tongue.

DISCOVERING the COINS of ECUADOR

By

KENNETH A. SILVER

Society for International Numismatics

The coins of Ecuador did not previously particularly interest me, when business took me to this public, I naturally started looking and for coins. This turned out to be both difficult and rewarding. There wasn't as far as I could find, an organized numismatic group in either the Capital, Quito, or the port of Guayaquil. After intensive inquiries, I was able, on my third trip, to locate one club - the Centro Numismatico y Numismatico de Guayaquil. This club, mainly devoted to collecting, had a few members who collected coins. I was privileged to view the collection of Sr. Emilio Gallegos O., a banker who had assembled the most complete type of Ecuadorian coinage known. He had received a prize from the Vice President of Ecuador which it richly deserved.

Viewing Sr. Gallegos' collection, it became evident that Yeoman's listing of coins would only serve as an initial guide, as there were many coins in it which simply were not listed in the catalog. But, finding these coins and obtaining them proved to be two different things. I think it was the challenge which initially got me on the road to seriously collect this series.

There were no coin stores at the time, a few stamp stores which had a 5 Sucre piece (SDNSA #4) which appealed to tourists, and one or two junk stores with a grab-bag of coins, surprisingly few of which

were Ecuadorian.

By letting everyone I met know that I was looking for coins, I was eventually able to get together sixty-seven different ones. Some of my contacts were bizarre, to say the least. One such was "a friend of a friend" of the hotel's room clerk, who showed up one night with a satchel full of coins. Their condition left something to be desired. When I pointed out that one of the coins he wanted to sell me was badly corroded, he said that was easily remedied and started to scrape it against the wall! He was mystified by my refusal to buy it. However, this chap eventually showed up with an almost perfect specimen of the rare 5 Francs of 1858 for which I traded him a \$14 transistor radio.

The gold Condor of 1928 (Y-43) and the 10 Sucre piece of 1899 and 1900 (Y-32) could be obtained, but most were counterfeit.

Of particular interest was a series corresponding to Y-2 through Y-5 which has, instead of the legend "Republica del Ecuador", the phrase "El Ecuador En Colombia". The only coin of this series that I was able to obtain was dated 1843. Now this is fascinating because Ecuador withdrew from the Republic of Greater Colombia on May 13, 1830. Yet, four years later the coins said that Ecuador was still in Colombia! I don't know the reason for this, but maybe it was their way of saying they wished they were back.

The familiar 1 Sucre piece of Reales for 1837 with the legends 1884 to 1897 (Y-31) turned out to be transposed. Other coins which I found that have an interesting variety. The legend (Lema) around the edge of the coin which reads "God Order Liberty" was struck with the coin 1. 1/2 Decimo of 1886 struck in Birmingham apparently in copper. This is the same coin as Y-26 which is an example of an up-side-down Sucre copper-nickel. from the Lima mint, I was told that

both versions exist for the Birmingham and Santiago mints as well. This makes six different varieties possible, presumably for each date.

Yeoman lists a #4 as a 2 Reales with the legends reversed for the year 1838. I was not able to find this coin, but I did find a 2

2. 1/2 Real of 1848 (Y-9) with a singular mark M, very similar to, but different from, the familiar M of Mexico.

3. A 5 Centavo copper-nickel dated 1909 similar to the 5 Centavo (Y-37), but definitely a thicker planchet. This may belong to the 1909 series

THE ENGLISH CROWN

By SALLY MARX

Calif. Foreign Coin Club Bulletin

The development of English coinage began after the Romans left Britain in the days of the Anglo-Saxons, when the largest English coin made of silver was the Sceat which was replaced in about AD 775 by the Silver Penny. It was not until the reign of Edward the First that a larger Silver Coin, known as the Great (four silver pennies) came to be minted in 1278 and some two hundred years later, in Henry VII's reign, the Testoon (after the French Teston) with a value of twelve pennies.

The Crown, as a Coin, was introduced into the English Coinage system during the reign of Henry the Eighth, when, because of the drain on the better quality English Gold coins to France, the King ordered to be minted The Crown of the Double Rose, with a value of Five Testoon (-), which was on a par with the French "Ecu d'or" (Crown of Gold.)

Early in the sixteenth century, Germany and Austria started issuing over Crown size coins known asalers and to keep pace with trading requirements on the Continent, the first Silver Crowns of the English Coinage were issued in 1551; the third coinage period of the Boy King Edward the Sixth.

It must be remembered that up to Queen Elizabeth the First's reign, the English coins had all been hammered by hand but during the period 1561 to 1571 some attempts were made to make the smaller coins by the use of machinery. Crowns and

other coinage continued to be hammered until Charles I came to the throne. A Frenchman named Nicholas Briot produced the first milled crown and for a period up to 1662 both hammered and milled coins were being issued as currency. After 1662 all new issue coins were made by machinery, the larger ones being made with a raised edge legend, to prevent clipping, which was common in those days. The old hammered coins still continued in circulation and were not withdrawn as legal tender until the great recoinage period commencing in 1696.

COINS of ECUADOR Cont'd

of ½, 1 and 2 Centavos - for which, however, a 5 Centavos is not shown.

In the course of my business trips I received in change a counterfeit 1 Sucre piece. If people in Ecuador are willing to go to the trouble to counterfeit the equivalent of a U.S. nickel, one is well warned to treat with suspicion underpriced examples of more valuable coins.

I found a great deal of pleasure in putting together this start towards a full collection of Ecuadorian coins with the ones prior to 1900 being of particular interest. I would venture to say that, based upon my experience, it might prove relatively difficult to assemble a more or less complete collection, as I am very doubtful that there exists a large enough stock of the minor coins and the older coins to satisfy the demand once these start to interest U.S. collectors.
